

Introducing the **AlphaQ UltraLite** Wireless Equine Imaging System

Highly respected by its users, the AlphaQdR equine imaging system reset many standards in terms of what equine practitioners demanded from their imaging systems.

Designed and built in Australia by Miatech Australia engineers, we are excited to announce our new soon to be released model, the AlphaQ **UltraLite**.

At a mere 10kgs in total weight and half the total volume of the already compact AlphaQdR we are looking to set even higher standards. Standards which we feel will change the way the equine veterinarian goes about daily business.

Integrated into the **UltraLite** package will be the MSI GS72 Stealth Pro 17.4" laptop. Currently the world's most powerful, thinnest and lightest PC in its class.

The package design internally, features extensive use of carbon fibre composite materials. Known for their incredibly high impact strengths and light weight, not to mention the sheer beauty. Our new imaging panel is extremely light and compact, being the size of a standard 2430 cassette with narrow borders and over 1kg lighter than the current 1012WCA panel.

ULTRA COMPACT AND FULLY LOADED • ONBOARD PC CHARGER • 2 BAY BATTERY CHARGER
17.4" REMOVABLE MSI GS72 PC WITH ELEVATING KEYBOARD AND DISPLAY
BUILT IN 801.11AC WIRELESS TECHNOLOGY FOR FASTEST POSSIBLE COMMUNICATIONS
INTERNAL CARBON FIBRE CONSTRUCTION • INDUSTRY LEADING ACQUISITION SOFTWARE
SYSTEM VOLUME 18.5LTR • SYSTEM WEIGHT 10KG
PANEL WEIGHT 2.3KG (incl battery, handle and protection covers)
WIRELESS PANEL WITH 801.11AC, STANDARD ISO CASSETTE SIZE of 326 X 266 X 15mm
HIGH STRENGTH MILITARY GRADE CASE FROM SKB
